TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, HTML, CSS, Python, C/C++, SQL

Frameworks & Tools: Spring Boot, React, Angular, Vue, Bootstrap, JUnit, Jest, Node.js, NoSQL, Azure, Postman, Git, Agile, DevOps, JIRA, Docker, AWS

EDUCATION

Simon Fraser University | Bachelor of Science - Computer Science

September 2023 - April 2027

PROJECTS

Event Tracker | Spring Boot, Java, Swing

March 2025

- Developed a tool for tracking special occasions, providing relevant information
- Built and integrated a RESTful API using Spring Boot to facilitate client-server communication
- Utilized the GSON library to parse and process JSON data
- Designed a seamless user interface using the Swing library
- Enabled users to efficiently manage and track events all in one place

Study Buddy | JavaScript, HTML, CSS

December 2024

- Worked in a team of three to develop an AI study assistant using Gemini
- Used DevOps practices to implement CI/CD for testing and deployment
- Integrated Google Calendar for event modifications and reminders
- Wrote unit and integration tests to ensure application reliability
- Provided students with a centralized platform for essential study tools

Emergency Reporter | React, BootStrap, TypeScript, HTML, CSS

November 2024

- Collaborated with a team of four developers to build an online emergency reporting app
- Integrated an interactive map using an API to display reported incidents as markers
- Enabled users to submit emergency reports with details such as incident type

Recipe Finder | React, TypeScript, HTML, CSS

October 2024

- Developed a recipe finder website that suggests recipes based on user-provided ingredients
- Integrated a recipes API to fetch and display relevant recipe results
- Implemented cuisine and course filters to refine search results
- Enabled users to quickly discover recipes using ingredients they already had

Weather Forecast | React, JavaScript, HTML, CSS

August 2024

- Developed a weather app that displays current conditions for any valid location
- Integrated a weather API for real-time weather data
- Showcases temperature, humidity, and other key details
